

Raffle Game

4.1-4.3, 5.5-5.6 Review

RAFFLE GAME

- Work the problems in your notebook. Most problems are calc OK.
- Write your name and the answer only on your raffle ticket.
- Turn in your ticket for each question on time to be eligible for each drawing!
- Drawings will be held every few questions. Spin the Prize Wheel to win!

Problem 1

Convert from degrees to radians. (NO CALC.)

$$100^\circ$$

Convert from radians to degrees. (NO CALC)

$$\frac{59\pi}{18}$$

Problem 1

Convert from degrees to radians. (NO CALC.)

$$100^\circ \quad 100^\circ \left(\frac{\pi}{180} \right) = \frac{10\pi}{18} = \boxed{\frac{5\pi}{9}}$$

Convert from radians to degrees. (NO CALC)

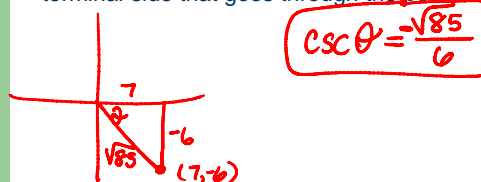

$$\frac{59\pi}{18} \quad \frac{59\pi}{18} \left(\frac{180}{\pi} \right) = \boxed{590^\circ}$$

Problem 2

Given the point (7, -6) on the coordinate axis, find the csc of the angle formed by the terminal side that goes through the point.

Problem 2

Given the point (7, -6) on the coordinate axis, find the csc of the angle formed by the terminal side that goes through the point.

$$\csc \theta = \frac{-\sqrt{85}}{-6}$$

Problem 3

Find $\sin \theta$ if $\cos \theta = \frac{2}{5}$ and $\tan \theta < 0$

Problem 3

Find $\sin \theta$ if $\cos \theta = \frac{2}{5}$ and $\tan \theta < 0$

Problem 4

From a distance of 1206 feet from a spot light, the angle of elevation to the top of the light is 43 degrees. Find the height of the spot light to the nearest foot.

Problem 4

From a distance of 1206 feet from a spot light, the angle of elevation to the top of the light is 43 degrees. Find the height of the spot light to the nearest foot.

Problem 5

Find the exact value (no calc)

$$\cos 150^\circ$$

Problem 5

Find the exact value (no calc)

Problem 6

Find the exact value (no calc)

$$\sin \frac{-5\pi}{4}$$

Problem 6

Find the exact value (no calc)

$$\sin \frac{-5\pi}{4}$$

$$\frac{\sqrt{2}}{2}$$

Problem 7

Find the exact value (no calc)

$$\csc 225^\circ$$

Problem 7

Find the exact value (no calc)

$$\csc 225^\circ$$

$$\frac{-2}{\sqrt{2}}$$

Problem 8

Find the exact value (no calc)

$$\cot \frac{3\pi}{2}$$

Problem 8

Find the exact value (no calc)

$$\cot \frac{3\pi}{2}$$

$$\frac{0}{-1} = 0$$

Problem 9

What compass heading is closest to a bearing of 192 degrees?

Problem 9

What compass heading is closest to a bearing of 192 degrees?

Problem 10

In $\triangle ABC$, find all possible measures, if any, of angle B.

$a = 20, b = 22, A = 32$ degrees

Problem 10

In $\triangle ABC$, find all possible measures, if any, of angle B.

$a = 20, b = 22, A = 32$ degrees

Problem 11

In Triangle MON, Angle O = 110 degrees, $m = 10$, and $n = 8$. Find o .

Problem 11

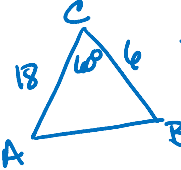

In Triangle MON, Angle O = 110 degrees, $m = 10$, and $n = 8$. Find o .

Problem 12

- Find the area of $\triangle ABC$ if $a = 6$, $b = 18$, and $m\angle C = 60^\circ$

Problem 12

- Find the area of $\triangle ABC$ if $a = 6$, $b = 18$, and $m\angle C = 60^\circ$

$$= \frac{1}{2}(18)(6)\sin 60^\circ$$

$$\approx 46.8 \text{ u}^2$$

Problem 13

Find the area of Triangle BIG if $b = 11$, $i = 9$, and $g = 4$.

Problem 13

Find the area of Triangle BIG if $b = 11$, $i = 9$, and $g = 4$.

$$s = \frac{11+9+4}{2} = 12$$

$$A = \sqrt{12(12-11)(12-9)(12-4)}$$

$$A = 17.0 \text{ u}^2$$
